Transfer Hook Finger
W x Long
10 x 120 mm

Recondition Your Grippers Only.

D/C	M2.581.727	2R/3054-D	17.00
U/C		2R/3054-U	17.00

Minum Quantiy Order (10) hook fingers

Gripping surfaces:

-D or D/C is a Diamond Coated Surface. Diamond coating is the process in which industrial diamond particles are electrolytically bonded to a steel gripper pad or fingers (the surface texture feels like a 60 grit sand paper).

-U or U/C is a Urethane Coated Surface. We cast and bake the Urethane to grippers, then grind the Urethane to the finish shape and size.

-P or P/S is a Plain Steel Surface. We grind the gripping surface to its proper angle and size.
